AVERAGE PAID SCORE

Source: GeoRepute Keyword Intelligence, joined with Google Search Console for the connected property

GeoRepute Keyword Intelligence scored 306 keywords for organic and paid opportunity and gave each a recommendation. The verdict is cautious: 254 keywords (83%) are marked Protect Organic, 39 have too little data to judge, 10 are worth considering for ads and only 3 clear the bar for Run Ads. No keyword scores above 49 on GEON, and 280 of 306 score below 20.

Search Console Performance

04

Five queries have real Search Console data, all variants of the brand name. Together they earned 3 clicks from 37 impressions. They carry no volume figure, so Keyword Intelligence marks them No Data.

Key Observations

05

Findings drawn from the data above, ordered by severity.

High Almost nothing qualifies for paid

Only 3 keywords earn Run Ads: "ai google", "ask ai", "ai voice". They sit among the highest volumes in the set (2,400, 880, 480 a month) and cost \$1.74, \$1.74, \$2.12 per click. The next 10 are Consider Ads.

Recommended tool: [Keyword Intelligence](#)

High Organic strength is weak across the board

The best GEON score is 49 and 280 of 306 keywords score under 20. 139 score zero. Even the name of the brand itself scores only 30.

Recommended tool: [Search Intelligence](#)

Medium Brand queries are invisible to the scoring

The five brand-variant queries bring 37 impressions and 3 clicks in Search Console but have no volume data, so they are scored No Data with Paid scores of 0 to 30. The keyword tools report no volume for them.

Recommended tool: [GSC Analytics](#)

Low 39 keywords need more data

39 keywords (13%) have no reliable volume, so no recommendation can be made. Re-run the analysis after the next sync before writing any of them off.

Methodology & Disclaimer

06

GEON Score and Paid Score are GeoRepute scores as exported, where higher is stronger. Recommendation is the action GeoRepute assigns to each keyword and is not a simple cutoff on Paid Score: 12 keywords with a Paid Score of 60 or more are marked Protect Organic, and each has a cost per click of \$6.67 or more or none listed. Search Console figures are for the connected property at last sync. This analysis is based on publicly available data, third-party research, and GeoRepute's proprietary analytical models. It does not represent verified or audited measurements and should be interpreted as directional insights rather than definitive factual claims.
