AVERAGE CPC

62

RISING KEYWORDS

Source: GeoRepute Keyword Research · CPC averaged over the 63 keywords with cost-per-click data

GeoRepute Keyword Research analyzed 306 keywords around the brand's category. Together they draw about 10,660 searches a month, but demand is thin and concentrated: "ai google" alone accounts for 2,400 (23%), the top three account for 35%, and only 17 keywords reach 100 searches a month. Competition is mostly low (130 of the 183 keywords that carry a rating), and the trend split is close to even: 62 rising against 70 falling. Treat the combined volume as an upper bound: 191 keywords sit at the lowest reported volume of 10 and add 1,910 searches (18% of the total), and close variants such as "ai search" and "ai searching" report the same volume separately.

Search Demand

google search ai	40	\$0.83	LOW	▲ Rising

Key Observations

06

Findings drawn from the data above, ordered by severity.

High

Demand is concentrated in a handful of head terms

"ai google" is 23% of all researched volume and the top three keywords are 35%. Beyond them the list is a long tail: 191 keywords sit at 10 searches a month and 34 show none.

Recommended tool: [Search Intelligence](#)

Medium

The biggest terms are also the cheapest

The two biggest keywords with cost data, "ai google" and "ask ai", cost \$1.74 and \$1.74 per click, against an average of \$4.04. The 17 keywords at \$5 or more, up to \$19.51 for "ai ideas for business", have a median of 30 searches a month.

Recommended tool: [Keyword Research](#)

Medium

Competition is low where it is rated, but two in five keywords are unrated

130 of 183 rated keywords are low competition, 37 medium and 16 high. 123 keywords (40%) have no rating, so the picture is incomplete for the long tail.

Recommended tool: [Keyword Research](#)

Medium

The combined volume overstates real demand

191 of the 267 keywords with volume sit at 10, the lowest figure the source reports, and near-duplicate phrasings ("ai search" and "ai searching", "ai engine" and "engine ai") each carry the full volume of the same search. The 10,660 total is therefore a ceiling, not a forecast.

Recommended tool: [Keyword Research](#)

Low

Momentum is evenly split

62 keywords are rising and 70 are falling, with 174 stable. Some of the largest terms are falling, so volume today is not a guarantee of volume next quarter.

Recommended tool: [Search Intelligence](#)

Low

Cost data covers one keyword in five

Only 63 of 306 keywords (21%) have a cost per click, so the \$4.04 average describes the priced minority, not the whole list.

Recommended tool: [Keyword Research](#)

Methodology & Disclaimer

07

Volume, cost per click, competition and trend are metrics as exported by GeoRepute Keyword Research. Blank cells mean no value was available. Volumes appear in rounded steps (10, 20, 30, 50, 70, 90, 110 and so on), so small values are approximate. This analysis is based on publicly available data, third-party research, and GeoRepute's proprietary analytical models. It does not represent verified or audited measurements and should be interpreted as directional insights rather than definitive factual claims.
