Key Observations

06

Findings drawn from the data above, ordered by severity.

High Search visibility is branded only

All five queries Search Console reports are variants of the brand name, including misspellings, and together they account for every click. Nobody is finding the site by searching for what it does.

Recommended tool: [Keyword Research](#)

High No non-brand demand captured

With 40 impressions in 30 days and no category or problem-based query in the data, the site is not yet appearing where new buyers search.

Recommended tool: [Search Intelligence](#)

Medium The home page carries everything

The home page holds all 3 clicks and 40 impressions at position 7.1. Pricing, contact, partners and waitlist each register a single impression.

Recommended tool: [Search Intelligence](#)

Medium Impressions abroad, clicks only at home

All 3 clicks came from Israel (60.00% CTR on 5 impressions). India, the Philippines and Mexico add 18 impressions between them and no clicks.

Low Volume is small

Fewer than 50 impressions is a thin sample, so treat these figures as directional and re-check after the next sync.

Methodology & Disclaimer

07

Figures come from Google Search Console for the connected property and the selected date range, as reported at the last sync. Position is the average ranking for the period (lower is better). This analysis is based on publicly available data, third-party research and GeoRepute's proprietary analytical models. It does not represent verified or audited measurements and should be interpreted as directional insights rather than definitive factual claims.
